Dear Municipal Customer:

The contamination rate at our TotalRecycle single stream recyclable materials processing facility has doubled over the past 12 months. This has created a twofold problem for us. One, instead of recycling materials, we are being forced to take the contaminated materials to our landfill to dispose of them, which is an additional expense, not to mention using up valuable landfill space. Secondly, many of these contaminants (non-recyclable materials) are causing costly breakdowns of our recycling lines, and, in some cases, even causing fires.

Below is a list of the most frequently received **non-recyclable materials which should not be placed with recyclables for collection**. We would appreciate your putting up this list of nonrecyclable materials on your website and social media sites, along with the attached sheet that displays these nonrecyclable materials:

- Garden Hoses, Ropes, Chains, Extension Cords, Christmas Lights
- Automotive Parts – Brakes, Engine Components
- Wood, Trees
- Household Electronics & Appliances
- Tarps
- Tools, Nails, Building Material
- Propane Canisters
- Hard Plastic toys
- Bed Sheets, Jeans, Clothes

Thank you for your cooperation.

Sincerely

Pasquale N. Mascaro

Attachment

TOP 10 items that should NEVER be in your Recycling Container

1.)

Garden Hoses, Ropes, Chains, Extension Chords, Christmas Lights

2.)

Automotive Parts: Brakes, Engine Components, etc.

3.)

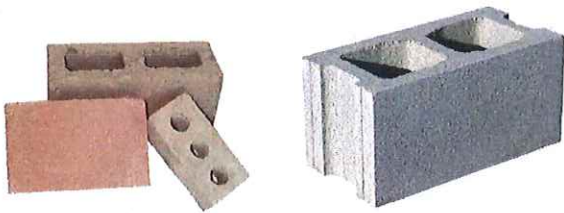

Wood, Trees

4.)

Household Electronics & Appliances

5.)

Construction & Demolition Debris

6.)

Tarps

7.)

Tools, Nails & Building Materials

8.)

Propane Canisters

9.)

Plastic & Metal Banding/Strapping

10.)

Bed Sheets, Jeans & Clothes
